

# Automated External Defibrillator (AED)

Our church now has a Philips HeartStart FRx Automated External Defibrillator (or AED). The AED has been installed just inside the inner doors at the 255 Oak Street entrance. Please see the photos below for the exact location.

Training on the use of AED's is not required as the device is designed to be very user freindly. It will automatically assess the patient and issue voice commands to guide the user. Further information on the use of the AED may be found on this website - <http://youtu.be/DHgNQ9DRZns>.
